Md Al-Mamun

REACTJS & NEXTJS DEVELOPER

ABOUT ME

Frontend developer with nearly 3 years of experience crafting intuitive, high-performance user interfaces using React.js, Next.js, and modern JavaScript. Skilled in writing clean, functional code with map, filter, and reduce, and passionate about solving real-world problems through user-focused design and clear team collaboration.

November 2022 - Current.

- Developed multiple production-grade web applications focused on performance and usability.
- Responsible for frontend design & development Using Reactjs & Nextjs.
- Conducted requirement analysis, designed user interfaces, and implemented them using modern frontend tools..
- REST API Integration and Manage project version using Github.

Jr Frontend Developer
ThemeShaper LTD, Nikunjo-2, Dhaka.
December 2021 – October 2022.

- Promoted application development culture within the organization.
- Responsible for developing web applications in collaboration with the technical team. Holding a position to promote app development culture in the institute.
- I helped my team members as a Reactjs Developer.

PROJECTS

- **Real Estates: Link: https://www.silveroakglobal.com/ (I managed the entire frontend development using React.js and Next.js, including API integration. Additionally, I collaborated with two team members to handle the design aspects)**
- **Ecommerce web app: Link: https://buniyadi.com/ (I was helped my team members to complete entire website and I designed most of the components using Reactjs and Nextjs)**
- **Ecommerce web app: Link: http://idolmart.shop/ (I've been working on this e-commerce project, handling both the frontend and admin CMS using Next.js 14. I use RTK Query for API integration and state management in client components)**

Note: In addition to the listed public projects, I've worked extensively on internal business applications such as medical diagnostic systems, e-commerce platforms, HRM, CRM, and e-learning tools. Most of these projects are live but hosted privately due to client confidentiality and business policies, and access requires authorized login. My role in these applications primarily involved building frontend components using React.js, Next.js, and occasionally jQuery, along with REST API integration.
